SUMMARY

Software Engineer with leadership experience in fast-paced, high-impact environments across both technology and nonprofit sectors. Currently working in high-frequency trading, with a focus on performance-critical systems, while maintaining strong interests in autonomous systems, AI, and drone technology. Outside of work, I lead a youth-focused NGO and teach STEM to youngsters aged 10–14 in weekend programs. I am committed to maximizing the potential of every environment I contribute to, creating positive impact through both technology and community building.

WORK EXPERIENCE

C++ Software Engineer, Team Lead | Broadridge

Dec 2022 - Present

- Leading a team of talented software developers in delivering high-quality, low-latency market connectivity solutions for EMEA and AMER exchanges in Tbricks.
- Providing technical guidance and mentorship, fostering a culture of continuous improvement while collaborating with cross-functional teams to design and implement new features.
- Driving efficiency in high-frequency trading environments, with hands-on experience across multiple exchanges (ICE, B3, CME, Euronext, Nasdaq, DRFQ) and expertise in diverse trading protocols and their variants, including FIX, ITCH/OUCH, and SBE.
- Implementing and integrating AI-driven solutions into our workflows to enhance team efficiency and productivity.

Software Engineer Analyst | Accenture Industry X.

July 2021 - Dec 2022

- Development of autonomously driven vehicles (Apollo, C++, Python, Cyber RT, CAD 3D)
- Development of a driver monitoring system for safety (C++ Computer Vision), a Rubik Cube solver robotic arm and a digital twin.
- Embedded automotive development for ESRLabs München

Working Student | Bosch Romania

Oct 2020 - June 2021

- Modelling and simulation of a Segway. Stabilization and control of the system using LQR and PID control strategies. Using Matlab, Simulink and Python to model and create 2D simulations;

EDUCATION

Master's in Artificial Intelligence

Oct 2022 - Present

Technical University of Cluj-Napoca | Faculty of Automation and Computer Science

Master's in Business Administration and Entrepreneurship

Oct 2022 - July 2024

Babes-Bolyai University | Faculty of Economics and Business Administration

- GPA: 9.63. Final exam: 10.00
- Thesis on "From Perception to Practice: Drone Technology in Romanian Agriculture"

Erasmus+ Exchange Student

Sept 2023 - March 2024

Ludwig-Maximilians-Universität München | Faculty of Economics and Business Administration

Bachelor's in System & Software Engineering

Oct 2018 - July 2022

Technical University of Cluj-Napoca | Faculty of Automation and Computer Science

- GPA: 9.41. Final exam: 10.00
- Thesis on "Autonomous Harvesting Robot with an Embedded GPU based Approach"

ADDITIONAL INFORMATION

- **Technical Skills:** Software Development (C++, Python, Git, Java, Flask, FastAPI), Embedded Systems (Raspberry Pi, Jetson devices, Automotive Ethernet), CAD Knowledge (Design & 3D Printing), Computer Vision and Machine Learning.
- **Soft Skills:** Organizational and Management Skills (leading Transylvanian Youth Center NGO, implemented 10+ youth projects co-financed by EU), Leadership (Canadian Rákóczi Foundation), Public Speaking (speaking at conferences, moderating discussions), Mentorship
- **Languages:** English, Hungarian, Romanian
- **Conferences:**
 - Computer Science Student Conference, 2022, Cluj -Napoca, 1st prize
 - From Perception to Practice: Drone Technology in Romanian Agriculture
 - Speaker at different events (MCC, DeepDive, Vibe, KMK Talks)
- **Volunteering**
 - Vice-president, executive @Transylvanian Youth Center.
 - STEM teacher and coordinator @Mathias Corvinus Collegium.
